

COMMUNITY INFORMATION

Modification 4 Construction Works 2022

MACHEnergy

Mount Pleasant Operation

MACH Energy Australia owns and operates the Mount Pleasant Operation (MPO) which is located approximately 3km north-west of Muswellbrook.

Mining activities commenced at MPO in October 2017 and MACH Energy has approval to produce up to 10.5 Mtpa of run-of-mine coal annually until December 2026.

The Community Information is to inform you of planned construction works to be undertaken as part of the approved Modification 4 for the MPO.

MPO's existing rail infrastructure is currently located on land south of Wybong Road. Modification 4 was approved by the Department of Planning and Environment in November 2018 and sought to relocate rail, water, and associated electricity supply infrastructure.

A Brief Timeline of the Project is outlined below

- Completion of the new rail loop and coal loadout – Q1 2022
- Complete the removal of existing rail loop – Q3 2022

MACH Energy Mount Pleasant Operation have commenced a community engagement program which will seek to identify issues of concern to our near neighbour and the broader Muswellbrook community and appropriate strategies to address these. Updates on the Project will be shared, and we will maintain contact with neighbours in the vicinity of the Project throughout the construction and removal phase.
