#### MACH ENERGY AUSTRALIA PTY LTD

### Mount Pleasant Operation Record of Meeting – Community Consultative Committee

Date	13 December 2018
Time Start	10:03 am
Time Finish	12:00 pm
Location	Mount Pleasant Operation – Training Room
Minutes	Lesley McLoughlin [LM]

Opening of	Meeting opened at 10:00
Meeting	Explained emergency procedures and muster area location in the event of an
	evacuation
	Acting Chair:
	David Ross [DR]
	Community Consultative Committee Members:
	Llewellyn Bates [LB], Jonathon Moore [JM], Tim Troon [TT], Trevor Parkinson [TP], Rod Upton [RU], Mayor Martin Rush [MR]
	Guests:
	James Barben [JB] NSW Minerals Council
	Government Department Representatives:
	None
	Muswellbrook Shire Council:
	None
	Mount Pleasant Operation:
	Ngaire Baker [NB], Andrew Kelly [AK], Ian Webber [IW], Lesley
	McLoughlin [LM] Chris Lauritzen (CL), Richard Baily [RB], Dean Sugden [DS]
	Thiess:
	Michelle Eckersley [ME], Peter York [PY]
Declaration of	DR request that people present disclose if they have any pecuniary
Pecuniary Interests	interests:
	[DR] paid to chair CCC meeting for the 13.12.18
Safety Share	<ul> <li>[RB] Construction works continuing around site. Also at this time of the year, be aware when working at heights around your home, lights</li> </ul>
	on rooftops etc.
	<ul> <li>[IW] Increased number of brown snakes sighted.</li> </ul>
1. Apologies	Mayor Martin Rush
2. Previous	The minutes from previous meeting September 9th, 2018 were accepted as a
Minutes	true record of the meeting. Moved by RU and seconded by LB.
3. Matters	
Arising	• [JM] Intersection at Wybong and Bengalla Link Roads.
	[RB] Changes have been made with a new chevron added. Wybong

	Mobili Fledsdill Operation
	<ul> <li>Road sign suggested.</li> <li>[JM] Suggestion made to add white painted lines on the road when approaching the T intersection.</li> <li>Action – [RB] Make a request to council to add white lines to increase safety of approaching the T intersection.</li> </ul>

7. Environment	<ul> <li>MACH Energy met with EPA to discuss air quality and dust management and proposed amendments to the EPL including relocation of monitor locations.</li> <li>MACH Energy and Thiess continue to meet weekly to discuss additional dust management strategies.</li> </ul>
	<ul> <li>MACH Energy is recruiting for Environmental team members and interviews are continuing hoping to have team established in the new year.</li> <li>Todoroski Air Sciences – Predictive model (Air Quality, Noise and</li> </ul>
	<ul> <li>blasting) data collection/setup continuing and predictive capability to commence in coming months.</li> <li>Focus on air quality and noise monitoring.</li> </ul>
	[JM] Is there an example of the last couple of weeks, where there has been delayed blasts because of environmental conditions?
	[PY] Yes this regularly occurs. Daily forecast conditions come in for the next 48 hours. Choose a time and day to favor blasting time. Systems occur, prior to initiation of other checks such as pre-blasting. If there is an issue, go

	through reporting process.
	[JM] Has there been an occasion where you could not blast due to conditions?
	[PY] Yes. Quite a lot wind speed, direction, detailed process that we follow.
	[JM] Is there a video of the blast? If fume is present?
	[PY] Confirmed yes, film each shot up to three minutes, use of GoPro
	cameras. Pit cameras, on some occasions drones are used.
	[TP] How many days would you've lost from dust?
	[PY] Dust delays – drought conditions 300ml rainfall.
	Upwards of 500 hours of down time year to date.
	[TP] That is a fair loss
	[PY] Not ideal, looking at different opportunities to minimize dust. Mount Pleasant Operation has the most restrictive license of dust in the Hunter Valley. Required to shut down at $44 \mu g/m3$ .
	[RB] Mount Pleasant Operation has shut down a significant number of times, we shut down before 44 $\mu$ g/m3. Very pro-active and Thiess shutting operations down regularly when we are not required to.
	[TP] How does community understand how you operate managing dust? How do we inform the public of how you are operating?
	[LB] Where is the monitor on Wybong road?
	[DS] APF2 being relocated to 417 Wybong road on the flats.
	[AK] To include in presentation of all location of monitors.
	[JM] From Muswellbrook point of view, really concerned what they can see. As the site is so visual. With the north westerly winds when machinery is working and there is not much of a breeze, the dust just rises. Increasing concern.
	Will be good to have feedback of what you are monitoring.
	[TP] Community do not understand how an open cut works. Truth is it will get worse, would be good to provide information to the community how Mount Pleasant Operations work.
	[JM] Few months ago, when driving down Wybong road it was noticed Mount Pleasant operating, could easily see a digger working and a water truck assisting, satisfying for the public.
7. Community	<ul> <li>A total of 110 community complaints have been received this year.</li> <li>The December edition of the MACH Energy Newsletter was distributed to all 2333 mailboxes emailed and posted to various stakeholders and employees. A copy has been added to Documents on the MACH Energy website.</li> </ul>
	<ul> <li>Good news stories in the December edition of @ The Coal Face.</li> </ul>
	Attended various near neighbour and Muswellbrook resident meetings.
	<ul> <li>GM and various operations staff attended the Muswellbrook Chamber of Commerce monthly meetings with the final meeting held on Tuesday 4th December.</li> </ul>
	• Participated in the Annual Upper Hunter Mining Dialogue Forum. Two displays, Environment and Procurement. Strong interaction with local stakeholders on both displays.
	<ul> <li>Conducted two school tours to site as part of the Upper Hunter Mining Dialogue School Tour Program. Mount Pleasant was due to participate in 2019, however, Bengalla could not conduct the final two tours due to a recent site incident and we were asked to assist.</li> </ul>
	• The final meeting of the ACDF was held on Wednesday 5th December
	<ul> <li>2018.</li> <li>Commenced local AM/FM radio advertising, brand awareness, 24hr operation etc.</li> </ul>
	1

	<ul> <li>Sponsorship of the following community organisations –</li> <li>St Heliers Heavy Horse Field Days</li> <li>Merriwa Junior Rugby League</li> <li>Merriwa Rugby League</li> <li>Denman &amp; District Cricket Club</li> <li>Muswellbrook Men's Shed</li> <li>Muswellbrook High School Presentation Night</li> <li>Muswellbrook Firies Santa Run</li> <li>Hunter Young Business Mind Awards</li> <li>Muswellbrook PCYC Christmas Appeal</li> <li>Cassilis Rodeo</li> <li>Muswellbrook Netball U13 Representative Team</li> <li>Muswellbrook Chamber of Commerce Business Awards</li> </ul>
	[TP] Does MACH Energy share complaints with other mine sites? [NB] Confirmed, we do not share details, however, the monthly complaint register is located on our website.
	[NB] Contact Muswellbrook Shire Council to advise when we cease operations.
	[TP] What does council do with the passed-on information?
	[NB] Sharing information with the community when they contact council to complain about mines and dust.
	[TP] How do we share with community? Facebook? Radio?
	[NB] Currently do not have social media, aware of the need for improved communication with community, instant news feeds would be idea and currently reviewing for next year.
9.General	DR request items relating to general business to be raised:
Business	<ul> <li>Upper Hunter Mining Dialogue Presentation – James Barben, NSW Mining, Director Policy.</li> </ul>
	<ul> <li>James thanked the CCC for the opportunity to present and also congratulated MACH Energy and the CCC for a well-run meeting.</li> </ul>
	[JM] Mines are quite confident of management practices are in place. Thinking your pamphlet would be positive. People live in the mining area, are concern that dust really is the issue. Must acknowledge and indicating to people working towards to improve.
	[LB] As a CCC member, been asked a few times with emplacement down by Wybong road will it be the same height as Bengalla?
	[RB]In current approval its less than Bengalla in the South, Going through process to understand Life of Mine Plan and this will determine the final level.
	[LB] Winds coming up the valley, we've have north westerly's a lot. The amount of loose dust that is picked up, lot of comments that you are driving through the dust. Days when its high wind, does not look good.
	[RB] We are trialing of use of broader scale polymer on disturbed areas that won't be used for a while or are less active. Spray a polymer over to get better sealing. Actively controlling areas to assist with that control. Hopefully this will be

#### **Mount Pleasant Operation**

	Mobili Pleasall Operation
	another stepping stone to mitigate, and if can improve over time we will.
	[JM] Main comment – just observation, driving home on Wybong road. The CHPP is truly lit up. Conversation among people that its bright.
	[RB] We are attempting to make sure lighting is shielded and directional, if lights location heading into Muswellbrook we will relocate. Feedback is appreciated.
	[JM] If driving back into town, come up to the crest, considerable gravel coming out from that area down to the edge. It is a hazard; can you please manage it?
	[AK] ACTION to have drains implemented.
	[TP] Bunds look completely different, Credit to MACH Energy and Thiess, improving every fortnight. Looks good and people are noticing.
	[CL] In MOD4 new text and conditions added, did work with natural looking landform. Change of the toe so it bends back and forth.
	[TT] I have been away on training for a while and coming back to learn just how much time the mine has been shut down due to dust is incredible. We should have the discussion about letting people know when you've shut down. SMS to community members to let them know? Give us the ability to support MACH Energy.
	We are all proud to be on this CCC, to get the mine to this stage is a monumental achievement, congratulations to all. [NB] Agreed and will send a text message to CCC when mine is shut due to dust.
	<ul> <li>Thanks to David Ross for standing in as Chairperson for this meeting.</li> </ul>
	<ul> <li>[DR] It has been lovely to work with a positive group of people. I can see what a great relationship you all have. If you don't know it already, you have a terrific CCC.</li> </ul>
10. Next Meeting	<ul> <li>Thursday 14 March 2019 from 10:00am – 12:30pm.</li> <li>Site tour for the 14th March 2019</li> <li>Meeting commences at 10.00am</li> </ul>
11. Close	Meeting closed at 12:10pm

END OF RECORDS
