Woodland Birds Project Plan	16	-	1 June 2018	-	-
Mine Site Rehabilitation Plan	19	-	22 October 2020 ⁵	TBC ⁵	-

Notes

- ¹ A revised Offset Management Plan (OMP) was submitted on 9 September 2019 to reflect MACH Energy's acquisition of the MPO and MPO's offset areas from Rio Tinto's Coal & Allied Pty Ltd, and to incorporate some minor revisions to reflect outcomes from the May 2019 Offset Advisory Committee meeting. The Commonwealth Department of the Agriculture, Water and the Environment (DAWE) provided comments on the revised OMP on 16 January 2020. The OMP was revised to address the DAWE's comments. As part of the revisions to the plan, the Re-establishment Plan required under Condition 11 of EPBC Approval 2011/5795 has been incorporated into the OMP (refer note below).
- ² The Re-establishment Plan (RP) has been incorporated into the OMP. The document is now referred to as the integrated OMPRP.
- ³ A revised integrated OMPRP has been prepared to reflect the varied EPBC Approval 2011/5795 (current as at 29 January 2026). The draft revised OMPRP was provided to DCCEEW on 11 July 2023 for review. DCCEEW has provided commentary on 4 December 2025, after which a revised OMPRP was provided to DCCEEW on 8 December 2025. A revised draft was most recently submitted to the Department on 29/01.
- ⁴ The revised Weed Project Plan was submitted under Condition 32 of EPBC 2011/5795 on 18 June 2024 and implemented by MACH Energy four weeks after submission.
- ⁵ The Mine Site Rehabilitation Plan is to be reviewed every two years for the first six years of implementation. It was reviewed in 2022 and no changes were required. In 2024, it was determined that the plan should be revised to incorporate the Mount Pleasant Optimisation Project landform approved under NSW Development Consent SSD 10418. This review was completed in 2025, and the Mine Site Rehabilitation Plan will be finalised and lodged with the Department for comment once judicial review challenges to the NSW Development Consent SSD 10418 are resolved.
